

JOCO STONE. SIDE TABLE

DESIGN: EOOS.

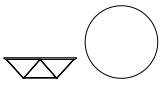

Frame	steel
Table top	stone table top thickness: approx. 20 mm
Information	Due to the manufacturing process, the size of stone tops may vary by +/- 1 cm.

Marble is a natural stone and can be damaged if subject to mechanical stress, or if it comes in contact with acid, fat or oil. It has an irregular surface and is very porous - veins, pores and inclusions are natural features. Sealing the surface is necessary for processing the material.

Every piece of marble is unique.

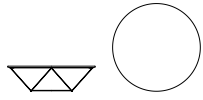

An image of the table top will be sent in advance for approval (130-T5, 130-T6).
